Windows Small Business Server 2011
Standard

Secure and Protect your Data with Windows Small Business Server 2011 Standard

Designed and priced for small businesses with up to 75 users, Windows Small Business Server 2011 Standard delivers enterprise-class server technology in an affordable, all-in-one solution. Windows Small Business Server 2011 Standard helps protect your business' information from loss by performing automatic daily backups and allows them to be more productive by providing features like e-mail, Internet connectivity, internal Web sites, remote access, and file and printer sharing.

Enjoy the benefits a complete server solution provides to your business

Increase Data and Network Protection. Windows Small Business Server 2011 Standard helps you focus on your core business objectives and not worry about the status of your IT, by providing automatic local backup and restoration of all their business critical data on the server.

Take Advantage of a Scalable Platform that Grows with the Business. As your business needs change, Windows Small Business Server 2011 Standard grows with you and meets your changing demands with a highly scalable platform. Easily add users, servers and applications, or expand into other Microsoft technologies as business needs evolve.

Stay Connected. Enable your users to easily access e-mail, contacts, and calendar to connect with their clients, vendors and suppliers seamlessly from virtually anywhere.

Benefits of Windows Small Business Server 2011 Standard include:

- Automatic backup of business data and simple recovery features

- Affordable and easy to deploy, use and maintain

- Enterprise quality functionality and productivity capabilities

- Organize and access files from virtually anywhere

Windows Small Business Server 2011 Standard is a complete, all-in-one on premise solution to your business IT needs.

Windows Small Business Server 2011 Standard Features at-a-Glance

Product Features	Functions
Help Protect Business Data	**Simplified Backup for Business Data** Automatically back up files with features that enable businesses to restore accidentally deleted files and recover the data on the network that may have been lost in disastrous events. **Client Protection** Monitors client computers for antivirus status, update compliance, and overall security health. **Network-wide Protection** Complete, network-wide security with integrated state of the art protection technologies.
Simplify Small Business IT	**Simplified Management** From one administrative console, get a comprehensive view of the health and security of PCs and servers in a business environment, making it easier to manage common IT tasks and address technology issues before they occur. **Reliability** Help ensure that each PC on the network is secure by automatically managing the Windows firewall on business servers and PCs and configuring them to best practices. **Flexibility** Responds to changing business conditions with the flexibility to adjust email to the organization's unique needs and a simplified way to help keep e-mail continuously available for end users.
Increase Business Productivity	**A Fully On-Premise Small Business Solution** Incorporates best-of-breed 64-bit product technologies to deliver a complete server solution environment well suited for small businesses. The product technologies include Exchange Server 2010, SharePoint Foundation 2010 and Windows Server Update Services. **Platform Scalability** Designed to provide a range of solutions tailored to meet the needs of small business customers at various stages of growth. Support critical line-of-business applications and run them on a secure award winning platform. **Online Collaboration** Get things done from virtually wherever and whenever. With Office Web Apps (included in SharePoint Foundation 2010), users can view, create, and edit documents anyplace with an Internet connection. **Remote Web Access** Enable your customers to stay connected by taking advantage of Windows Small Business 2011 Standard enterprise class e-mail, contacts, calendar and communications with new Microsoft® Exchange Server 2010 Standard. Access is easy with the new and improved Remote Web Access.
Greater Business Insight	**Information Organization** Reduce the amount of time spent trying to manage, find and save business information—centrally store, organize, share and even search critical data. **Enhanced Support for Line-of-Business Applications** *with Premium Add On* Run a vast number of line-of-business applications on an additional server, and enjoy the powerful data management and analysis solutions that makes it possible to use many server-based business applications.
